Art Unit: 1623

Applicant is advised that the application is not in proper condition for examination. There is a discrepancy between the transmittal papers and the preliminary amendment of 11-14-00. The former indicates that the case is a continuation of parent application of 08/816,823, while the latter indicates that it is a continued prosecution application. During telephonic communications on June 1, 2001 with Judy, assistant to Applicant's representative A. Blair Hughes, the Examiner was informed that the filing was intended to be a continuation. Applicant is advised that the case has been treated as a continuation. However, the preliminary amendment of 11-14-00 cannot be entered because it does not comply with 37 CFR § 1.126, which requires that claims be numbered consecutively. The proposed new claims are numbered 21-25, but claim 11 is the last originally-filed claim. Applicant should submit a new preliminary amendment which properly identifies that filing as a continuation, and which numbers claims to be added starting with 12.

Papers relating to this application may be submitted to Technology Center 1600 by facsimile transmission. The number of the fax machine for official papers in Technology Center 1600 is (703) 308-4556. Any document submitted by facsimile transmission will be considered an official communication unless the cover sheet clearly indicates that it is an informal communication.
